

Arbor Low

By

AJ Noon

You pay your pound and they let you in,

And onto this bank you should climb,

From on high you can survey the ring,

Fifty stones from Neolithic time.

First protected in the 1880's,

Built with locally quarried limestone,

There are two causeways, with two entries,

And in the middle was found human bone.

Seven blocks for the centre, called a cove,

And at each entrance monoliths guard,

To the East was found a burial trove,

Just watch the win, it blows hard and cold.

Whilst you're here take a look at Gibb Hill,

A Bronze Age Barrow built over another,

Inside was found a stone cist burial,

Arbor Low is a place to discover.
